0505-9	Horizon Signal Technologies	"SQ 3 TS Portable Traffic Signal" - The SQ3TS manufactured by Horizon Signal Technologies is a trailer-mounted, portable traffic signal conforming to MUTCD guidelines. Horizon's portable traffic signals consist of two trailers that can be towed in tandem with one vehicle. Horizon's signal trailers have been designed to withstand 80mph wind gusts when fully deployed with no additional ballast. Each signal trailer is equipped with 2 signal heads that have 12" LED lamps. One signal head is mounted on an over head mast arm extending over the travel lane. The other signal head is mounted on the vertical mast at the side of the road. Signal heads rotate 180 degrees for flexible trailer placement. -- Each Horizon traffic signal is powered with 16 6 volt batteries that are recharged with solar panels & an onboard 110 volt charger. The batteries can furnish the system up to 21 days of consecutive operations power (calculated at 72 degrees Fahrenheit) with no charge. Each trailer contains a Morningstar charging monitoring system, which monitors, regulates, and displays solar input and battery voltage. -- Horizon's Modular operation System features the ability to utilize up to 16 signals, controlling up to 9 traffic phases in a single set-up. Horizon Traffic Signals can be operated in fixed time, traffic actuated, or hand controller mode. Communication methods include cable, quartz and AV radio. Each Horizon signal controller is equipped with an integrated conflict downloadable format. -- Optional add-on equipment includes Back Plates, Pilot Car Module, 24 hour GPS System, and interface module. The interface module allows the Horizon signal to be used in traffic signal knockdown, or signal relocation applications.	--	Complete	--	Accepted
